

Creating Cyber-Physical Social Networks

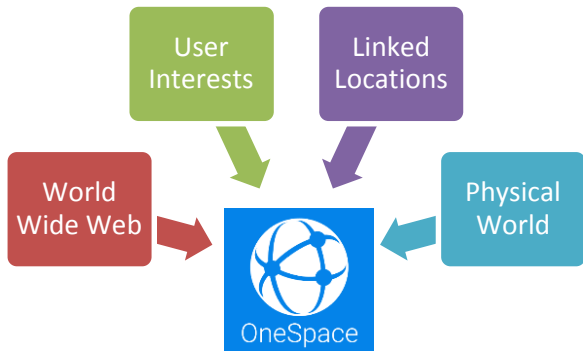

OneSpace is all about connecting users with shared interests. User's interest derive from their current locations in the physical world as well as their browsing activity in the virtual world. As a cyber-physical social network, OneSpace enables new and enhanced services.

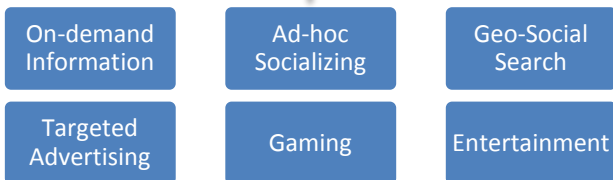

Social Network Evolution

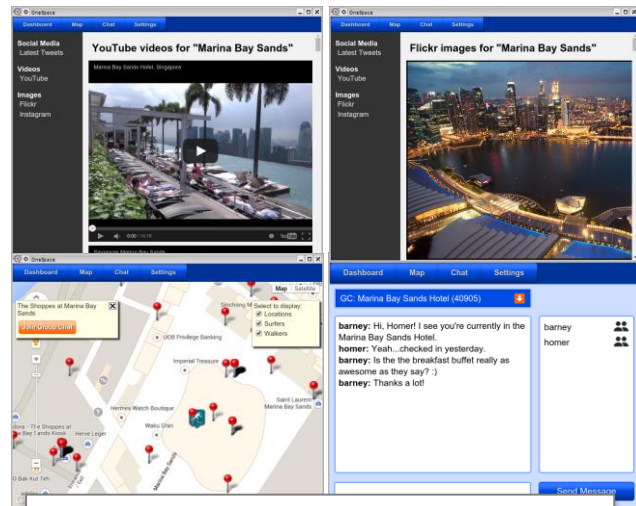

Overview

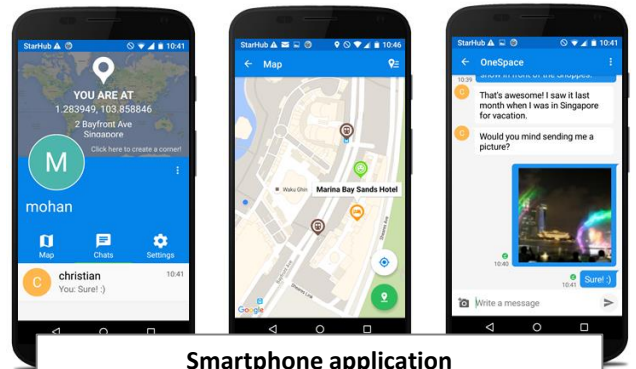

Enhanced and Novel Services

Frontend Applications

Browser add-on – different views
User Barney is browsing the website of the MBS hotel

Smartphone application
Mobile user Homer is close or even in the MBS hotel

Principal Investigator: Prof. Mohan Kankanhalli
Co-inventors : Dr. Christian von der Weth
Mr. Ashraf Mohammed Abdul
